

ALA-91-14
-35.36 M water depth

LATITUDE: 29:50.01
LONGITUDE: 87:39.86

LOCATION: Offshore Alabama - outer continental shelf

Unit 4 0-241 cm (2.41 m)

Light greyish tan, massive, fine-to-medium grained sub-rounded to sub-angular quartz sand.
Small shells and shell fragment found randomly throughout in very low quantities.
Fines upward starting at 175 cm

Unit 3 241-290 cm (0.49 m)

Tan and some gray, subtly bioturbated fine grained quartz sand with some shell fragment and isolated clay.

Unit 2 290-297 cm (0.07 m)

Dark grey clay (rip-up clast?)

Unit 1 297-366 cm (0.69 m)

Light tan, massive, medium grained, sub-angular to sub-rounded clean quartz sand with some isolated areas of grey clay. Possible rip-up clasts.
Some indistinct grey.
